**AkzoNobel**  
Tomorrow's Answers Today

## **AKZONOBEL AEROSPACE COATINGS AT DUBAI AIR SHOW**

**13-17 Nov, Booth W467/468**

### **OFFERING SUSTAINABLE COATING SOLUTIONS**

AkzoNobel Aerospace Coatings, the market leader in gloss and color retention is delighted to be attending the Dubai Air Show 2011. Visitors to the AkzoNobel booth on the Dutch Pavilion will be informed on the new Aerobase<sup>®</sup> and Aerodur<sup>®</sup> base coat / clear coat systems.

In line with the focus on sustainability, the base coat/ clear coat systems offer high quality, efficient and environmentally progressive paint solutions. The Aerobase<sup>®</sup> and Aerodur<sup>®</sup> systems can help save time and cut costs by shortening application time and easier in-service coatings maintenance.

The first to deliver reliable base coat / clear coat systems to the industry, AkzoNobel Aerospace Coatings' Aerodur<sup>®</sup> and Aerobase<sup>®</sup> systems only require one coat per color and one layer of clear coat, resulting in reduced paint usage. The proven two hours drying time of the base coat helps to reduce energy consumption and labor costs, while aircraft leave the paint facility with the best looking, most durable decorative finish available on the market.

Built on extensive technical knowledge and experience AkzoNobel Aerospace Coatings' new technology is expected to change the future of paint application to external surfaces on aircraft. For airlines around the globe both Aerobase<sup>®</sup> and Aerodur<sup>®</sup> offer the ultimate in decorative finishes and an opportunity to strengthen their brand identity with aircraft which look 'factory new' for longer.

AkzoNobel Aerospace Coatings shall be exhibiting at Booth W467/468 and look forward to seeing you.

Ends.

#### **Safe Harbor Statement**

This press release contains statements which address such key issues as AkzoNobel's growth strategy, future financial results, market positions, product development, products in the pipeline, and product approvals. Such statements should be carefully considered, and it should be understood that many factors could cause forecasted and actual results to differ from these statements. These factors include, but are not limited to, price fluctuations, currency fluctuations, developments in raw material and personnel costs, pensions, physical and environmental risks, legal issues, and legislative, fiscal, and other regulatory measures. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies. For a more comprehensive discussion of the risk factors affecting our business please see our latest Annual Report, a copy of which can be found on the company's corporate website [www.akzonobel.com](http://www.akzonobel.com).
