Tomorrow's Answers Today

AkzoNobel Aerospace Coatings Presents Two Successful Brands at MRO Europe

AkzoNobel Aerospace Coatings is delighted to be attending MRO Europe, in Madrid, where Market Directors shall discuss the company's successful Aerodur® Base Coat /Clear Coat system along with the Aerofine® product range for cabin interiors

AkzoNobel's world class Aerodur® Base Coat/Clear Coat system provides a door opener for paint facilities looking for excellence, efficiency and environmentally progressive paint solutions. The revolutionary product range is designed to reduce application time and materials usage while giving aircraft owners the best looking, most durable finish in the industry. Its environmental friendliness offers potential benefits to the sustainability image of paint facilities, airlines and aircraft owners alike.

AkzoNobel Aerospace Coatings is taking another exciting step forward with the launch of Aerofine®; a new range of products developed for the Cabin Coatings market, currently being rolled out across Europe with plans for introducing to Asia and the USA later in the year.

The Aerofine® brand already represents a consistent, durable performance, easy application and value for money whilst being totally VOC compliant. The quick drying Aerofine® products shorten process times by comparison with solvent based products and also enable the application of special effects within very short time periods.

AkzoNobel Aerospace Coatings representatives shall be delighted to meet you in Madrid - booth number: 225/227, 27th-29th September, 2011.

AkzoNobel is the largest global paints and coatings company and a major producer of specialty chemicals. Safe Harbor Statement

This press release contains statements which address such key issues as AkzoNobel's growth strategy, future financial results, market positions, product development, products in the pipeline, and product approvals. Such statements should be carefully considered, and it should be understood that many factors could cause forecasted and actual results to differ from these statements. These factors include, but are not limited to, price fluctuations, currency fluctuations, developments in raw material and personnel costs, pensions, physical and environmental risks, legal issues, and legislative, fiscal, and other regulatory measures. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies. For a more comprehensive discussion of the risk factors affecting our business please see our latest Annual Report, a copy of which can be found on the company's corporate website www.akzonobel.com.
