

# Polystop LP Dispenser

## Efficient polyester-filler dispenser

Polystop LP

**AkzoNobel**

Tomorrow's Answers Today

Combine the effectiveness of Polystop LP (Long Pot life) with the efficiency of the polyester-filler dispenser of AkzoNobel Aerospace Coatings.

### Accurate proportioning

The hand-held, manual dispensing system is used for the accurate proportioning of the 2-component Polystop LP, a low VOC polyester stopper, which fills dents and other surface irregularities on different substrate types.

### Convenience

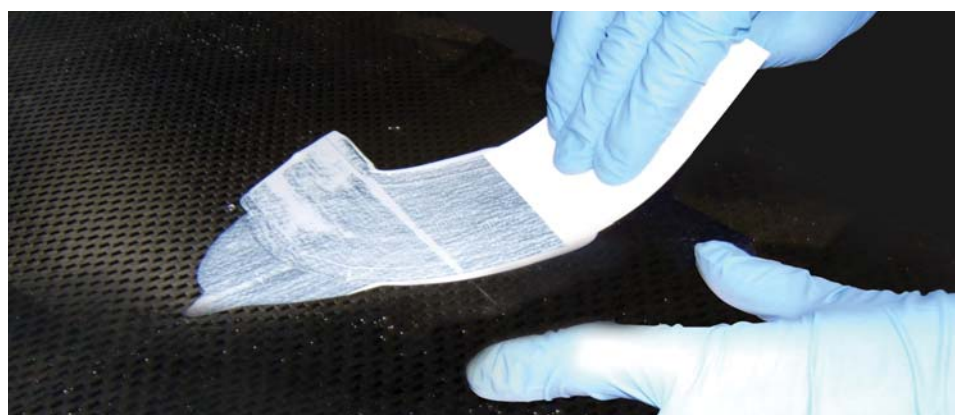

The dispenser adds convenience to the process of measuring and handling the materials, while reducing contact to skin and exposure to material fumes.

### Flexibility

With a variable mixing ratio of 1, 2 or 3 parts of hardener, the dispenser offers control. Depending on the specific needs, the drying time can be accelerated by selecting the favorable pot life/drying balance. This will maximize throughput and reduce waste.

### Features and benefits of the system

FEATURES	BENEFITS
Precise dispensing system	Accurate product proportioning
Variable mix ratio	Accelerated curing with a controllable pot life
Re-closable cartridges	Reduce waste
Improved operator safety	Reduce exposure
Easy portability	Use anywhere
