

# Burst Packs

## Fit for purpose

The ease of mixing pre-measured small volumes at the point of repair.

**AkzoNobel**  
Tomorrow's Answers Today

Burst Packs are the ideal packaging for providing small quantities of paint for use at the point of repair. The pack consists of two or more pouches that safely keep the base and hardener solutions separate until the coating is required. By safely rupturing the internal seal, by the action of squeezing the pack, the base and hardener can be mixed together. Burst Packs are supplied in either clear or foil pouches, dependent on the contents.

### Features and benefits of the system

FEATURE	ADVANTAGE	BENEFIT
Small quantities of paint	Reduces waste	Benefits the environment
Various sizes are available, from 15ml to 60ml	You can mix the correct amount	Reduces costs
A range of products are available in Burst Packs	Suitable for most situations	Greater flexibility of repair
Inner seal keeps the content separated	Safe storage of coatings	Less waste
Pre-filled quantities	Accurate mixing	To ensure product performance
User-friendly package format	Easy application at the point of repair	Optimizes processing time
6 months of shelf life	On stock and available when you need it	Reduces waiting time
